(Back binding)		bc			
		And so on...			

* If you would like the actual page numbers displayed and not the generic TTP pagination shown in column 3 - please ensure these are supplied in column 2.

** Column 4 should always end with an odd number, followed by **ibc**, then **bc**.

We often superimpose a content page image on top of the inside front & back cover images, so ifc (inside front cover) may be composed of 2 digital images, likewise ibc (inside back cover). In these cases, enter the filenames of both the page image and binding image.
